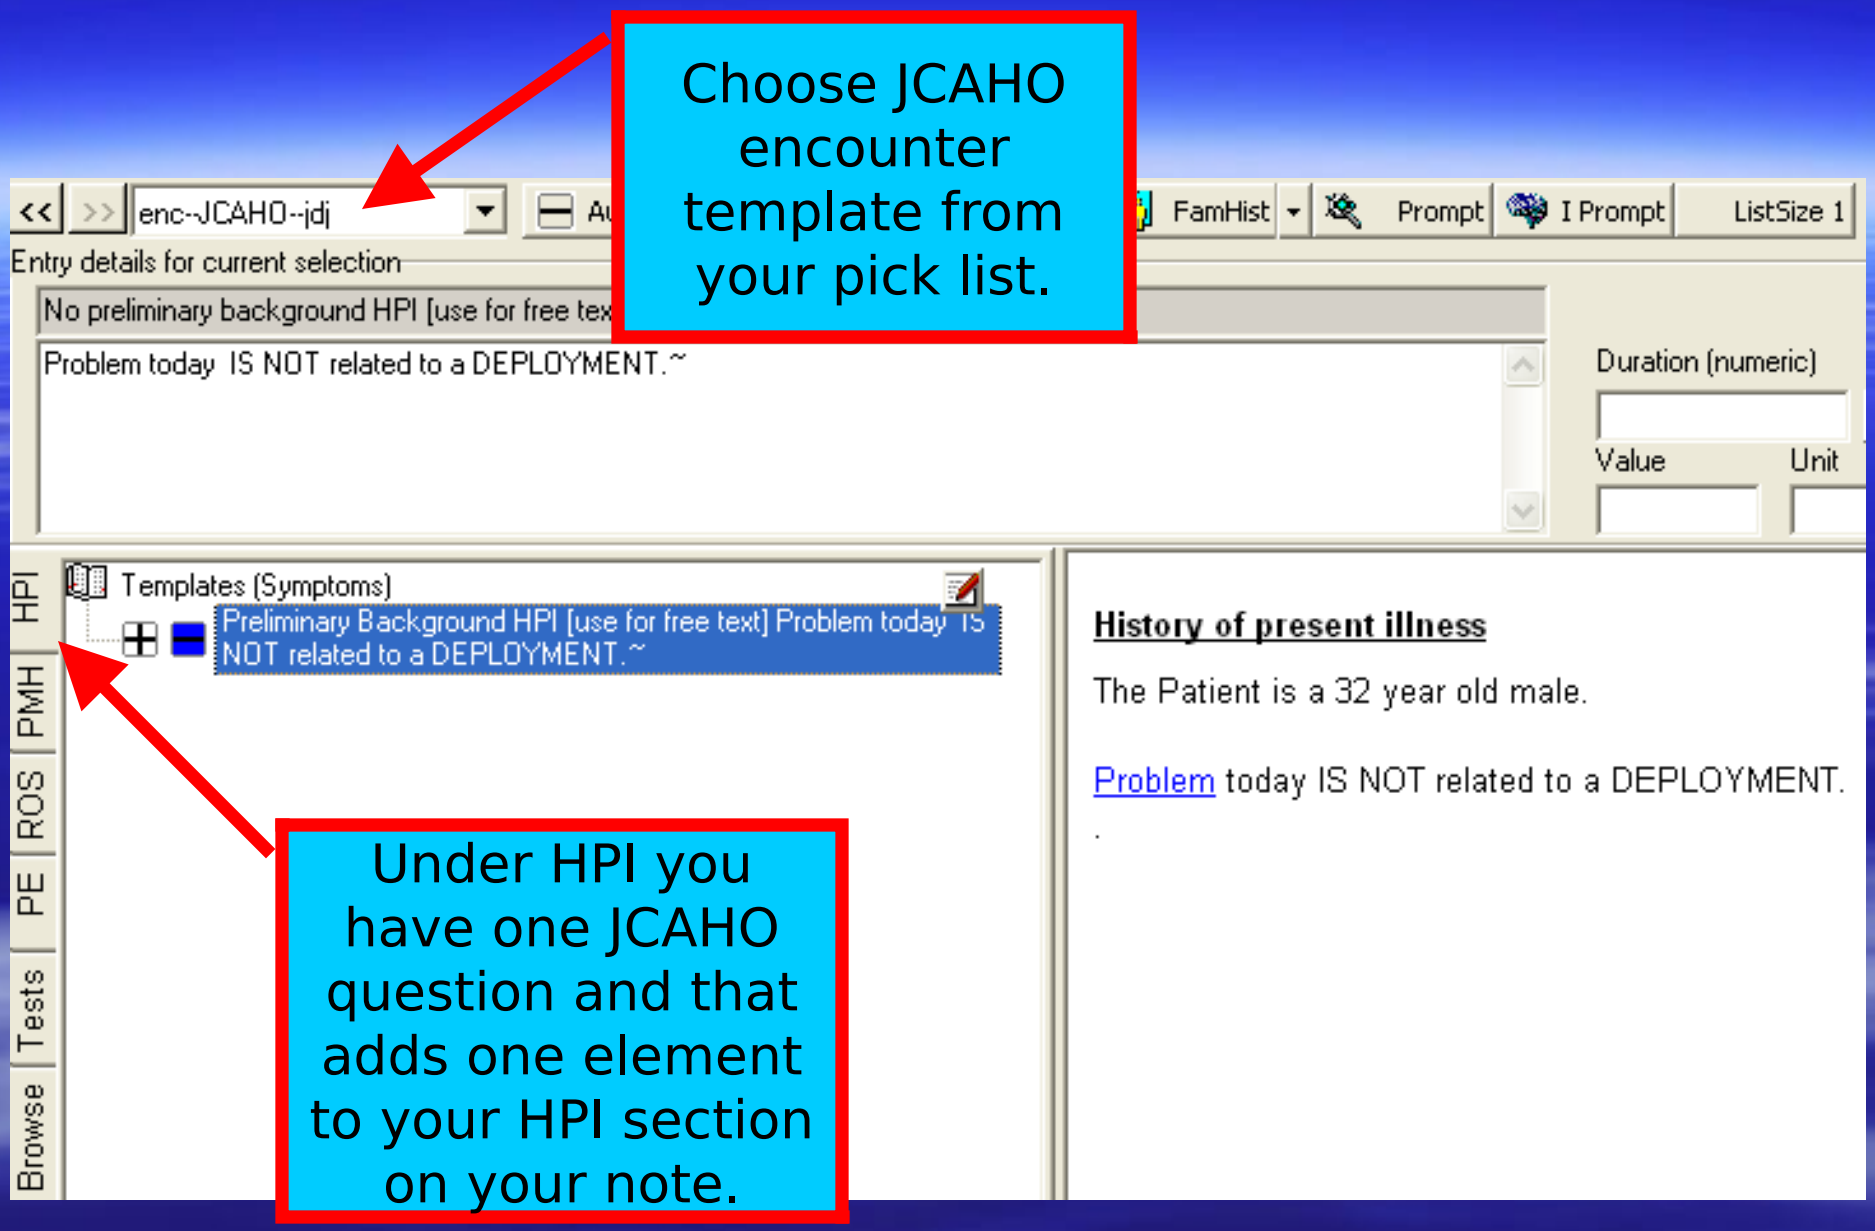
This is a real patient that I saw in my clinic. The medics did not document the JCAHO questions in the S/O format. I only got a 99212 for the encounter. No review of system or PFSH (past medical history) questions.



Choose JCAHO encounter template from your pick list.

Preliminary Background HPI [use for free text] Problem today IS NOT related to a DEPLOYMENT.~
History of present illness
The Patient is a 32 year old male.
Problem today IS NOT related to a DEPLOYMENT.
Under HPI you have one JCAHO question and that adds one element to your HPI section on your note.

receptive to learning.
history of Herbal Medicines
Several JCAHO questions under PMH section. Of note, if the patient is breast feeding, the medic needs to change the “is not” to an “is” in the free text area of this question.

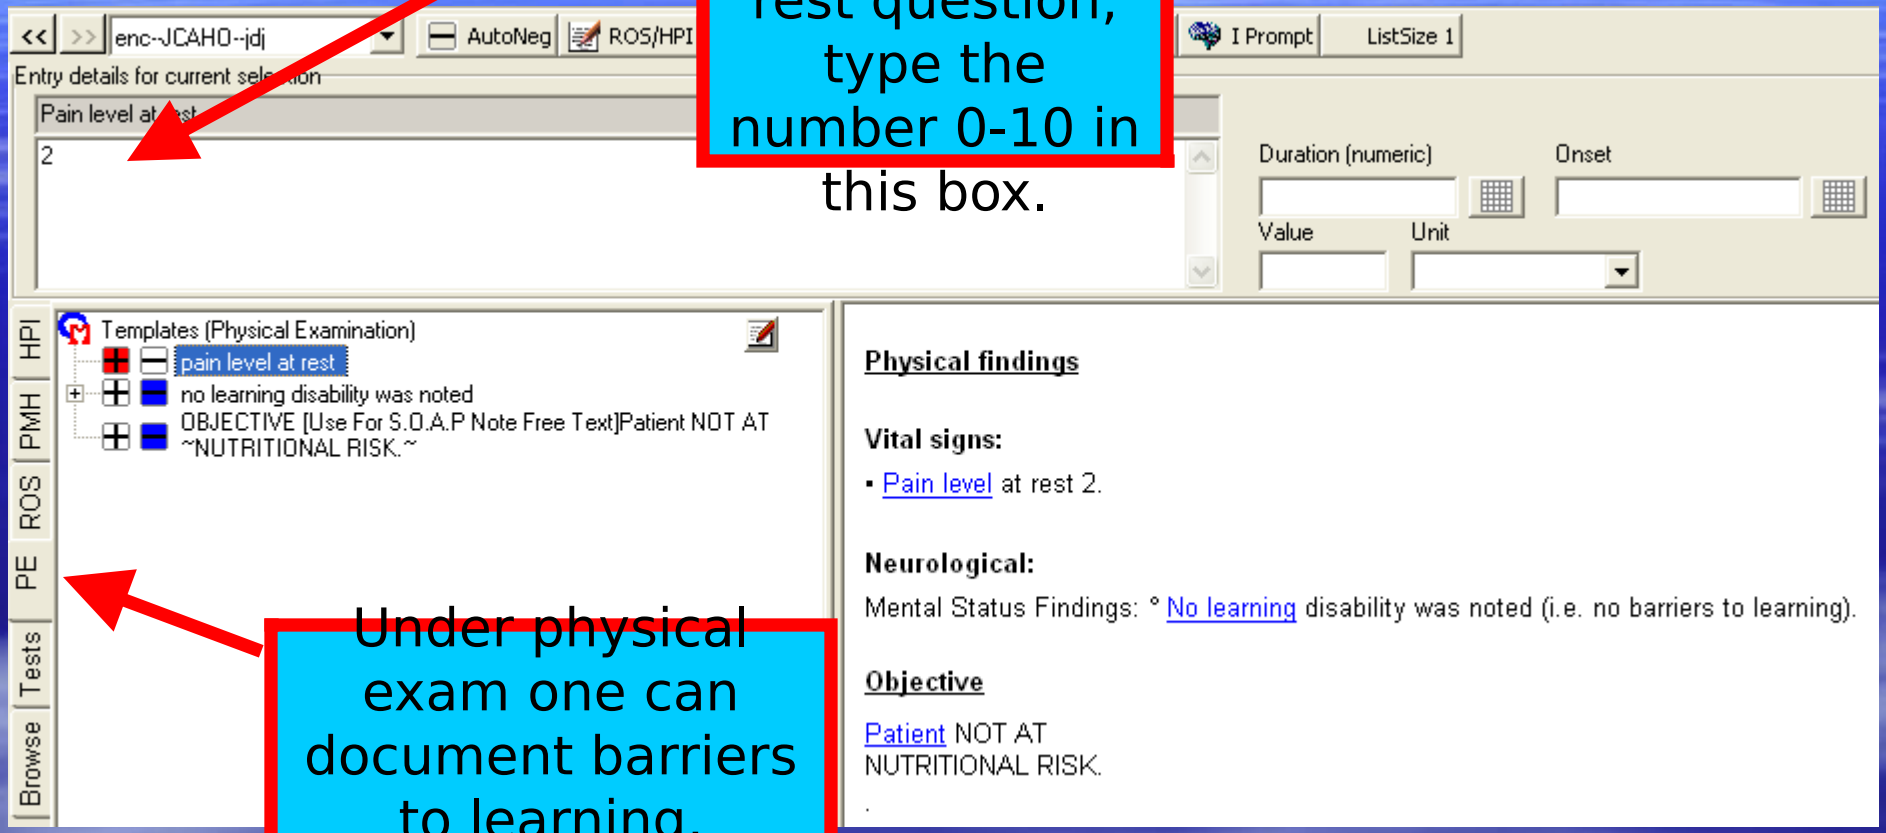
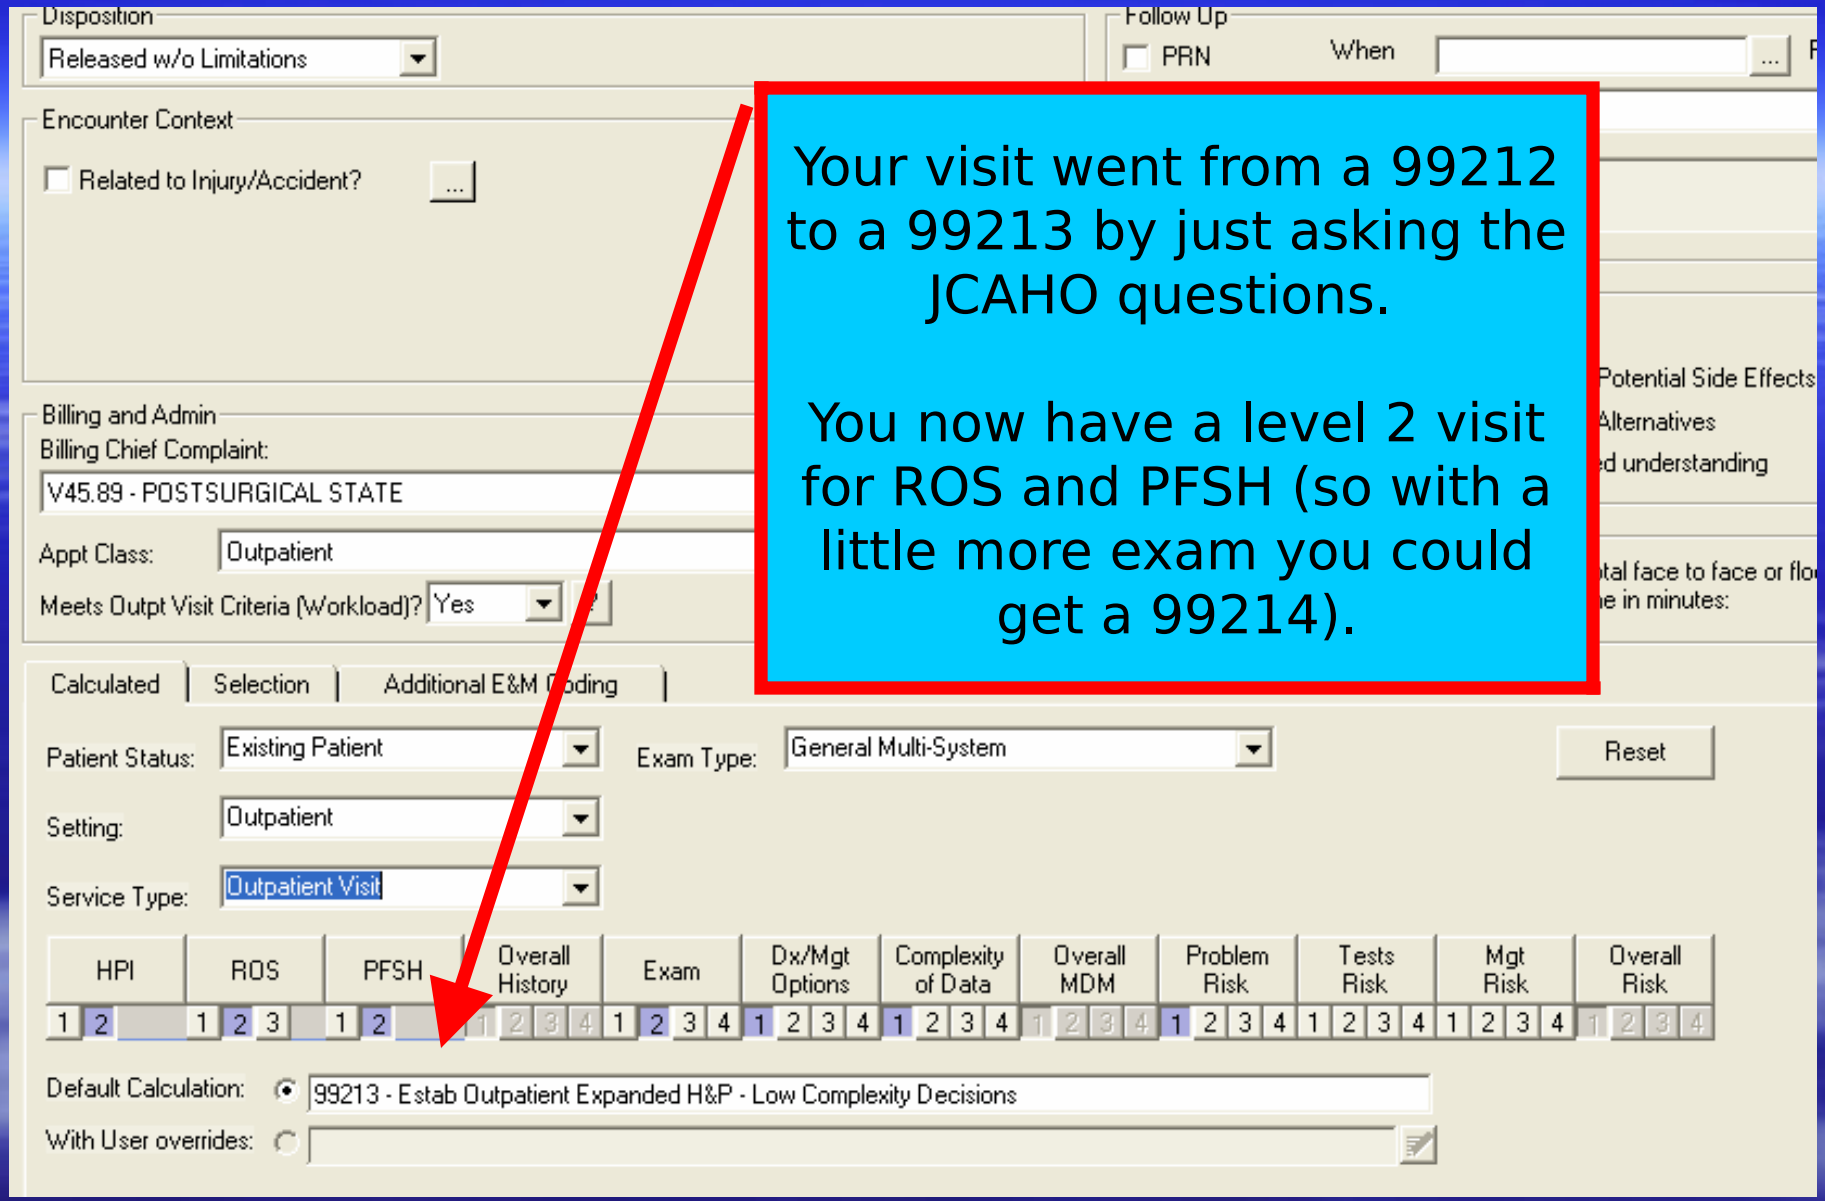
no recent weight change
no recent depression
no feelings of hopelessness
no loss of interest in activities
no anhedonia
Under review of systems (ROS) you get 1 point for weight change and 1 point for the depression questions.

When answering the pain level at rest question, type the number 0-10 in this box.



Under physical exam one can document barriers to learning, whether the patient is at nutritional risk, and the pain level.



Your visit went from a 99212 to a 99213 by just asking the JCAHO questions.

You now have a level 2 visit for ROS and PFSH (so with a little more exam you could get a 99214).

Questions?
